(54) Title: METHOD OF AN APPARATUS FOR DRIVING A PLASMA DISPLAY PANEL

(57) **Abstract.** The present invention relates to a method and a device for driving a display panel, in particular a plasma display panel (PDP), including cells each corresponding to a pixel in response to a video signal including fields wherein each field is formed by a plurality of subfields, wherein during the processing of a current field the number of subfields per field is adjusted (RU) for a next field in accordance with predetermined parameters.
